

# Plant Management Network International

## University Partners Program

[www.plantmanagementnetwork.org](http://www.plantmanagementnetwork.org)

### MISSION STATEMENT

The PLANT MANAGEMENT NETWORK is a not-for-profit forum for applied, multidisciplinary, science-based, plant and crop management information and communication. This collaborative endeavor of the plant science community strives to provide a comprehensive, premier Internet resource for everyone interested in the applied plant and agricultural sciences.

*Engendering Innovation in the Plant Sciences*

*"Publishing online in Plant Health Progress allowed me to rapidly reach a broad group including both practitioners and scientists. As a research scientist and former Dean, I regard this new online network of peer-reviewed journals as equal in prestige to similar print journals and would highly recommend publishing in them."*

— Professor Larry E. Schrader, Plant Physiologist/Horticulturist  
Washington State University Tree Fruit Research & Extension  
Center

# *PMN University Partners Program*

Working together, PMN partners in research, extension, and teaching, in cooperation with other nonprofit and related organizations, create a comprehensive Internet resource for everyone involved in the applied plant and agricultural sciences.

## **PMN Institutional Partner Benefits**

**Partnership provides the following benefits for participating institutions:**

- Publicizes partner universities and their programs to readers worldwide, by display of the institution's logo, descriptive profile, and email and Internet links throughout the PMN site.
- Increases regional, national, and international usage of participating universities' web-based fact sheets and other materials through inclusion in the PMN Plant Science Database, a searchable database of partner-hosted agricultural resources.
- Provides complimentary personal subscription registration for all university faculty, students, and staff (including county extension personnel), enabling individual access from any Internet-connected computer by user name and password; and providing monthly alerts of new articles and other network developments.
- Automatically includes an institutional subscription for the university library, establishing a system-wide electronic gateway to all PMN publications and collections.
- Supports page charge-free publication in PMN's peer-reviewed journals for all university personnel.
- Provides input to the direction of the network through the PMN Advisory Council, Richard Stuckey, chair.

## **PMN Institutional Subscription Benefits**

**Partner universities receive unlimited access to all PMN subscription content for use in research, teaching, extension, presentations, and all other noncommercial use. PMN's growing suite of materials currently includes the following publications and collections:**

- *Crop Management*, a peer-reviewed journal of applied crop science
- *Plant Health Progress*, a peer-reviewed journal of applied plant pathology, entomology, nematology, and weed science
- *Fungicide and Nematicide Tests*, an annual publication available electronically from 2000 forward
- *Biological and Cultural Tests for Control of Plant Diseases*, an annual publication available electronically from 2001
- *Crop Management Variety Trials*, a new section in its beginning stages
- PMN Image Collections, a set of nearly 1,500 digital plant and agricultural images
- PMN Plant Science Database, an index of over 2,000 PMN articles and partner-based web resources

## **Coming in 2003**

- *Forage and Grazinglands*, an applied, peer-reviewed journal in the stated subject matter
- Additional Publications and Components, as available

## **PMN Author Benefits**

- Peer-Reviewed Publication
- Permanently Citable
- Real-time Publication within 1-3 Weeks of Acceptance
- Worldwide Recognition
- No Page Charges
- Free Use of Color
- Direct Email Links to Corresponding Authors
- Linkable Literature Citations
- Free PDF File of Completed Article for Use
  - Filling Reprint Requests
  - Posting on Author's Personal Website
  - Including in Performance Review Packets
