**Reviewers**
Clayton Hollier, Louisiana State University
Douglas J. Jardine, Kansas State University
Edward Sikora, Auburn University
Adam Sisson, Iowa State University

**Contributors**

**Alfalfa**
*Author:* Albert Tenuta, Ontario Ministry of Agriculture, Food, and Rural Affairs, and Craig Grau, University of Wisconsin–Madison
*Reviewer:* Paul Esker, University of Costa Rica

**Canola**
*Author:* Samuel Markell, North Dakota State University
*Reviewer:* Carl A. Bradley, University of Illinois at Urbana–Champaign

**Corn**
*Authors:* Carl A. Bradley, University of Illinois at Urbana–Champaign; Daren S. Mueller, Iowa State University; and Kiersten A. Wise, Purdue University

**Cotton**
*Author:* Robert C. Kemerait, University of Georgia
*Reviewer:* Kenneth Seebold, University of Kentucky

**Dry Beans**
*Author:* Robert Harveson, University of Nebraska–Lincoln
*Reviewers:* Howard Schwartz, Colorado State University, and Craig Grau, University of Wisconsin–Madison

**Flax**
*Author:* Khalid Y. Rashid, Agriculture and Agri-Food Canada
*Reviewers:* Carl A. Bradley, University of Illinois at Urbana–Champaign, and Samuel Markell, North Dakota State University

**Peanut**
*Author:* Robert C. Kemerait, University of Georgia
*Reviewer:* Nicholas S. Dufault, University of Florida–Gainesville

**Potato**
*Author:* Amanda J. Gevens, University of Wisconsin–Madison
*Reviewer:* Nicholas S. Dufault, University of Florida–Gainesville

**Pulse Crops**
*Author:* Michael Wunsch, North Dakota State University
*Reviewer:* Lyndon Porter, U.S. Department of Agriculture, Prosser, Washington

**Rice**
*Authors:* Scott Monfort, Clemson University; Donald Groth, Louisiana State University; and Tom Allen, Mississippi State University
*Reviewer:* Richard D. Cartwright, University of Arkansas

**Small Grains**
*Authors:* Erick De Wolfe, Kansas State University, and Marcia McMullen, North Dakota State University

**Sorghum**
*Author:* Douglas J. Jardine, Kansas State University
*Reviewer:* Tamra Jackson-Ziems, University of Nebraska–Lincoln

**Soybean**
*Author:* Daren S. Mueller, Iowa State University
*Reviewer:* Kiersten A. Wise, Purdue University

**Sugar Beet**
*Author:* Mohamed F. R. Khan, North Dakota State University
*Reviewer:* Robert Harveson, University of Nebraska–Lincoln

**Sunflower**
*Author:* Samuel Markell, North Dakota State University
*Reviewer:* Robert Harveson, University of Nebraska–Lincoln

**Tobacco**
*Author:* Kenneth Seebold, University of Kentucky
*Reviewer:* Nicholas S. Dufault, University of Florida–Gainesville
The American Phytopathological Society

The American Phytopathological Society (APS) is the premier society dedicated to high-quality, innovative plant pathology research. For more than a century, members of APS have been making and sharing significant breakthroughs, both for the science and for society. APS membership comprises a distinctive community of scientists, whose energy and commitment ensure the global advancement of this critical discipline. Plant pathology is an interdisciplinary science that includes botany, microbiology, crop science, soil science, ecology, genetics, biochemistry, molecular biology, and physiology. Most plant pathologists have master’s and doctoral degrees and are employed by colleges and universities, state and federal government agencies, agricultural companies, or international institutes or work as private practitioners. APS members represent a broad range of specialties, from pushing frontiers in the accuracy and speed of field diagnosis to increasing our understanding of plant pathology through laboratory research. The diversity of the membership and the science makes the society pertinent to a multitude of research areas, while the international involvement ensures that the latest innovations from around the world are available to all.

APS PRESS, the nonprofit publishing imprint of APS, has published more than 300 titles, including the Compendium of Plant Disease Series and the Plant Health Management Series. APS PRESS books and digital products are used by educators, students, plant scientists, extension specialists, crop consultants, county agents, growers, master gardeners, horticulture specialists, nursery and landscape workers, greenhouse employees, forestry specialists, plant pathologists, mycologists, nematologists, virologists, entomologists, weed scientists, and plant molecular biologists among others. APS PRESS is guided by a volunteer editorial board composed of scientists from all major areas of plant pathology.
